SIEMENS GOVERNMENT SERVICES INC., OPENS NEW OFFICE IN HUNTSVILLE, ALABAMA

Reston, Virginia, June 30, 2010 – Siemens Government Services (SGS), an integrator of Siemens innovative technology products, services and solutions to the federal government, announced today that it has opened a new office in Huntsville, Alabama. The office will be home to SGS' Program Management Office, supporting current contracts and work initiated under its Utility Monitoring & Control Solutions III (UMCSIII) and Electronic Security Systems IV (ESSIV) contracts with the U.S. Army Corps of Engineers, Huntsville Center of Excellence (CEHNC).

"With a recognizable footprint in the federal market, innovative solutions capabilities and a global network of technicians, the new office allows SGS to continue to meet the increased requirements for building automation, energy management, and integrated security solutions for CEHNC projects", said Rick Gonder, Vice President of SGS' Security and Infrastructure Practice.

As the need for Siemens products and services continue to grow, the company anticipates so too, will its physical presence in this geographic region. According to Harry Feuerstein, SGS' President and CEO, "We are quite pleased to continue develop our Program Management Office in Huntsville, directly in support of the U.S. Army Corps of Engineer's efforts. The establishment of this new office clearly signifies our continued investment to provide more focused support and dedicated personnel to the Corps of Engineers; while ultimately helping to stimulate local job creation within the Huntsville area."

SGS' Huntsville office is located in the Eclipse Business Center at 7027 Old Madison Pike, Huntsville, Alabama.

About Siemens Government Services, Inc.

Siemens Government Service (SGS) is a wholly-owned subsidiary of Siemens and is an integrator for the broad range of innovative Siemens products, solutions, and services performed for the U.S. Federal Government. Headquartered in Reston, Virginia, SGS provides answers to the government's toughest challenges related to facility energy management, integrated security, asset lifecycle management and security maintenance support services.
